

RAJ KAMAL

Data Analyst / Developer

Kakinada, Andhra Pradesh, India | Phone: 9798785919 | Email: rajkamal9741@gmail.com

Portfolio: <https://rajkamall.me> | GitHub: <https://github.com/1rajkamal> | LinkedIn: <https://www.linkedin.com/in/raj-kamal-490176291>

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Data Science, with hands-on experience in Python programming, data analysis, exploratory data analysis (EDA), data cleaning, and machine learning. Skilled in building data-driven applications, predictive models, and interactive dashboards using Python, Pandas, NumPy, and SQL. Strong foundation in statistical analysis, database management, and generative AI, with a track record of translating raw data into actionable insights.

CORE SKILLS

Programming Languages: Python, Java, C++, SQL

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Statistical Analysis

Machine Learning & AI: Machine Learning, Natural Language Processing (NLP), Generative AI, Predictive Modeling, Scikit-learn

Databases: MySQL, SQL, Database Management

Web Development: HTML, CSS, JavaScript, Flask, Streamlit

Tools & Platforms: Git, GitHub, Jupyter Notebook

Core Competencies: Data-Driven Decision Making, Leadership, Communication, Problem Solving

PROJECTS

AI Interview Assistant — Generative AI Platform

- Developed an AI-powered interview assistant using Python, Streamlit, and Google Gemini AI to analyze resumes and PDF documents.
- Engineered logic to generate personalized interview questions and evaluate candidate responses, applying NLP and generative AI techniques.
- Built an end-to-end data pipeline covering PDF parsing, text extraction, and automated response evaluation.

MoodSense — Mood Detection & Sentiment Analysis System

- Built a sentiment analysis application in Python using NLP and Machine Learning to classify user emotions from text input.
- Performed data cleaning and exploratory data analysis (EDA) on text datasets using Pandas to improve model input quality.
- Applied classification algorithms to categorize sentiment, translating unstructured text into structured, actionable labels.

Loan Prediction System — Machine Learning Web Application

- Developed a machine learning model with Scikit-learn to predict loan approval status based on applicant financial and demographic data.
- Performed data preprocessing, feature engineering, and EDA to improve model accuracy and reliability.
- Integrated the predictive model with a Flask backend and built a responsive interface for real-time predictions.

Expense Tracker — Personal Finance Data Manager

- Built a web application to record, store, and analyze daily expense data and financial transactions.
- Designed features for spending analysis and reporting to help users identify trends in personal financial data.

CERTIFICATIONS

- Python Certification — Cisco
- Java Certification — Oracle
- Programming Essentials in C — CLA
- Database Management Systems (DBMS) — Infosys
- IT Specialist: HTML & CSS — Certiport
- Python — Red Hat
- Exploratory Data Analysis in Python — Udemy
- SQL — HackerRank

EDUCATION

B.Tech in Computer Science and Engineering (Data Science)

Aditya University | Expected Graduation: 2027
